To Mayor Pelligrini and Members of Council,

I attended the open house several weeks ago to hear about the proposed apartment building on Main Street. I would like to put my objection to the proposal on record.

I understand a three story building is permitted under current zoning. However, even with three stories, let alone six, the increased traffic that would result on Main Street seems irresponsible.

I also believe there will be runoff from the paved areas surrounding the building which would cause irreparable damage to the Dufferin Marsh wildlife.

Is this project really necessary in a small village. What advantage is there in placing an apartment building in a location that would be an eyesore among the existing historic homes, not to mention the effect it would have on the abutting properties. Residents that currently enjoy looking at nature and wildlife will be seeing a building instead of the view.

The additional density would also put more pressure on our water treatment and sewage systems.

Schomberg does not need to grow anymore. People live here because they enjoy a small community.

Respectfully submitted,

Karin Price
